LIST OF INTERCEPTED PLANT PESTS, 1972

(Pests Recorded From July 1, 1971, Through June 30, 1972)

David H. Girard

Plant Quarantine Inspector

INTRODUCTION

This, the 59th annual report of agricultural quarantine work in the United States, reflects the fourth publication to be assembled and printed from computerized interception records. It summarizes the records of plant pests found in, on, or with plants, plant products, and carrier (1) imported into or entering the United States or the offshore possessions, (2) offered for entry but refused, (3) in quarters or stores of planes and ships, (4) entered for immediate transportation and exportation in bond, (5) in domestic shipments to the mainland from the States of Alaska and Hawaii, the American Virgin Islands, the Commonwealth of Puerto Rico, Guam, and other possessions, or (6) in preclearance inspection in the Bahamas and Bermuda.

Insects, mites, mollusks, diseases, and nematodes are tabulated separately. The pests listed are of known or potential importance to agriculture and either not reported or not widely distributed in the United States. Some common organisms are included if they are new to the country of origin or the host plant.

The records were made from identifications received during the fiscal year 1972 and include some interceptions from previous years that were not determined until this year. Most insects and mite identifications are made by specialists of the Systematic Entomology Laboratory and Plant Protection and Quarantine Programs (both of the U.S. Department of Agriculture) and the Department of Entomology of the U.S. National Museum of the Smithsonian Institution. Snail identifications are made by personnel of the Plant Protection and Quarantine Programs and the Division of Mollusks of the Smithsonian Institution. Disease, nematode, and host identifications are made by personnel of the Plant Protection and Quarantine Programs and the Agricultural Research Service.

Scientific names of insects and diseases are reviewed by specialists of the Plant Protection and Quarantine Programs who assist in producing the list. Nematode names are checked in the Nematology Laboratory, Plant Protection Institute, Agricultural Research Service and host names in the Plant Genetics and Germplasm Institute, Agricultural Research Service. The common names given for hosts are usually those shown in Standardized Plant Names. Every effort is made to conform to the International Rules of Nomenclature.

Family names of insects, mites, and snails are given in the tabulation and orders are shown in the host list.

NOTES ON PESTS INTERCEPTED

The total number of interceptions submitted to the specialists during the fiscal year 1972 was 23,707. The total number of interceptions determined by inspectors during the fiscal year 1972 was 73,430, while our identifiers determined an additional 46,588 interceptions during the same period. Of those identified during the fiscal year, 15,884 were considered of enough significance to be tabulated, as compared with 14,649 the previous year. This does not include non-economic or the incompletely determined organisms which were not added to the figures in the summary.

*Heterodera avenae Wollenweber, 1924.....	Belgium, England, Europe (country-?), Germany, Italy, *Poland, Spain, Sweden.	16	2	5	CA, FL, LA, ND, NE, NY, OH, OR, SC, VA, WA.....
Soil with automobile					
Soil with sod					
Soil with toy					
Soil with tractor					
Soil with unidentified plant					
Soil with Lilium sp. (lily bulb)					
Soil with Solanum tuberosum (potato)					
Heterodera cruciferae Franklin, 1945.....	Netherlands.....		2		CA, LA.....
Soil with Allium asparagrasum (leek)					
Soil with Brassica rapa (turnip)					
Heterodera fici Kirjanova, 1954.....	Italy.....			1	NY.....
Soil with unidentified bulbs					
Heterodera punctata Thorne, 1928.....	Austria, Belgium, England, Europe (country-?), Germany, Ireland, Italy, Netherlands, Norway, Unknown.	21	4	10	CA, FL, MA, NE, ND, NJ, NY, PA, SC, VA, WA.....
Soil					
Soil with automobile					
Soil with cactus plant					
Soil with sod					
Soil with tractor					
Soil with unidentified plant					
Soil with Apium graveolens var. rapaceum (celeriac)					
Soil with Chrysanthemum sp. (plant)					
Soil with Citrus limon (plant)					
Soil with Mentha sp. (mint plant)					
Soil with Pastinaca sativa (parsnip)					
Soil with Poa pratensis (sod)					
Soil with Rosa sp. (rose plant)					
Soil with Sansiviera trifasciata (potted plant)					
Soil with Solanum tuberosum (potato)					
Soil with Thuja sp. (arborvitae plant)					
Heterodera rostochiensis Wollenweber, 1923.....	England, Germany, Ireland, Netherlands, Poland, Scotland, Switzerland, United Kingdom.	8	12	8	AL, FL, LA, MA, ND, NJ, NY, PA, VA, WA.....
Soil					
Soil with automobile					
Soil with baggage					
Soil with cactus plant					
Soil with tractor					
Soil with unidentified plant					
Soil with Allium asparagrasum (leek)					
Soil with Amoracia lapathifolia (horseradish)					
Soil with Beta vulgaris (beet)					
Soil with Calluna vulgaris (heather)					
Soil with Daucus carota var. sativa (carrot)					
Soil with Pastinaca sativa (parsnip)					
Soil with Poa pratensis (sod)					
Soil with Saintpaulia sp. (African violet plant)					
Soil with Solanum tuberosum (potato)					
Heterodera schachtlii Schmidt, 1871.....	Netherlands.....		1		AL.....
Soil with Brassica napus (rutabaga)					
*Heterodera trifolii Goffart, 1932.....	*Belgium, England, Europe (country-?), Germany, Netherlands.	6			FL, OR, SC.....
Soil with tractor					
*Macroposthonia xenoplax (Raski, 1952) DeGrise & Loof, 1965...	Japan.....			2	CA.....
Bambusa sp. (bamboo plant)					
Pinus parviflora (pine plant)					
Wothocriconea autubile (Taylor, 1936) De Grise & Loof, 1965.	Mexico.....			1	AZ.....
Plant (unidentified)
